

GUEST & PHILIPS

The Guest & Philips Watchstrap Measurement Gauge

How to measure your watchstrap size:

1. Measure the gauge and ensure that it is 270mm by 20mm (at it's thinnest point).
2. Cut out the watchstrap gauge and make a slit where shown.
3. Push the end through the slit and slip it over your wrist.
4. Adjust the gauge so that it sits comfortably around your wrist.
5. Do not allow for strap overlap or adjustment – we will do this.
6. Read off the dimension in millimetres as indicated by the arrow, and that is your size.

Please remember:

1. Ensure that the gauge is comfortable.
2. Do not pull on the gauge tightly as this will give you the wrong size.

Note: You can use the guage to measure an existing strap that you are happy with.
